Crb Bearing

CRB10016 Cross Roller Bearing- CRB3510

Bearing NO.	CRB3510
Dimensions	
d	30
D	60
B	10

Because the main shaft of the lathe USES , the forming time of the lathe is reduced, and the center of the spindle of the CNC vertical lathe is also reduced, but its performance is greatly improved. In addition, because of the roller is cross arranged, the effective distance between roller increases, increases the degree of rotation and stable performance, roller rolling drive bearing rotation, only relative between roller rolling, did not produce sliding phenomena, so that the consumption of the whole nc vertical lathe spindle is greatly reduced, reducing the fuel consumption, relatively more environmental protection, reduce noise, reduce the use of raw materials.
